Local Infants and Toddlers Program Results for Early Intervention Services

Maryland: Indicator 3

Percent of infants and toddlers with IFSPs who demonstrate improvement.

Narrative Description of Indicator

To report the percent of infants and toddlers with IFSPs who demonstrated improvement for FFY 2008, MSDE generated data from the statewide Part C database comparing the status-at-entry and status-at-exit data on infants and toddlers in the program between 7/1/08 and 6/30/09 and who participated in the MITP for at least 6 months. Data were computed and summary statements required by the Office of Special Education Programs (OSEP):

Summary Statement #1 - Of those infants and toddlers who entered early intervention below age expectations in the percent who substantially increased their rate of growth by the time they turned 3 years of age or exited the program.

Summary Statement #2 - The percent of infants and toddlers who were functioning within age expectations in the program at the time they turned 3 years of age or exited the program.

State of Maryland Baseline Data 2008-2009	Social Emotional Skills	Acquiring & Using Knowledge & Skills	Taking Appropriate Action to Meet Needs
Summary Statement 1	62.8%	71.3%	55.4%
Summary Statement 2	83.6%	57.3%	78.4%

Data from FFY 2008 cannot be compared to previous year's data because FFY 2008 was the first time that states report baseline data to OSEP. In addition to reporting baseline data, the State was required to submit targets for 2010.
