Narrative Description of Indicator

For the reporting period, all (100%) Part C 618 data tables and the Part C SPP were submitted on the due dates.

All (100%) State-reported data is accurate, including data reported through 618 tables, the State Performance Plan, and A Performance Report.

To calculate the percentage of State-reported data that is timely and accurate for FFY 200, MSDE used the rubric recommended by OSEP for Indicator 14, which combines the timeliness of 618 and APR submission with the accuracy of data reported in the SPP/APR. With electronic edits built into the Part C database and systematic procedures for data verification and validation, MSDE has met its target for this indicator.
