Narrative Description of Indicator

For the reporting period, all Part C 618 data tables and the Part C SPP were submitted on the due dates. All State-reported data were submitted accurately, except Table 2 - Settings. This table was originally submitted to OSEP with one child in the wrong age group. The data were corrected and resubmitted. The state data of 96.4% did not meet the state target in FFY 2011.

To calculate the percentage of State-reported data that is timely and accurate for FFY 2011, MSDE used the rubric recommended by OSEP for Indicator 14, which combines the timeliness of 618 and APR submission with the accuracy of data reported in the SPP/APR. With electronic edits built into the Part C database and systematic procedures for data verification and validation, MSDE has met its target for this indicator.
