### Narrative Description of Indicator

Maryland gathered census data. An administrative record exchange was used for data collection. The Maryland State Department of Education (MSDE), Division of Special Education/Early Intervention Services (DSE/EIS), Division of Career and College Readiness (DCCR), Division of Accountability and Assessment (DAA), the University of Baltimore, the State Department of Labor Licensing and Regulations (DLLR), the Developmental Disabilities Administration (DDA), and the National Student Clearinghouse (NSC) collaborated to gather the data for this report.

- DLLR provided data on the youth who were competitively employed.
- NSC provided data on the youth who have been enrolled for at least one term in higher education anywhere within the United States.
- DDA provided data on the number of youth served by the Governor’s Transitioning Youth Initiative. These youth are participating in individual community based supported employment, community based enclave employment, employment training that utilizes sheltered employment and workshop training.

The University of Baltimore, under a contract with the MSDE, gathered data from the DLLR. The University gathered data on all youth who exited school and who were:

- Competitively employed on a full or part-time basis within the geographic region that includes Maryland, Pennsylvania, Delaware, Virginia, and West Virginia.

The National Student Clearinghouse, under a contract with MSDE, gathered data on the youth enrolled in postsecondary education nationwide.

Data was collected using the MSDE Unique Student Identification Number. The data is disaggregated by school district, sex, and disability. The data from the DDA was the actual number of students who were determined eligible for services from DDA.

Data was collected on youth who exited during school year 2010 -2011. These leavers are youth who left school by graduating with a regular high school diploma, exiting with a Maryland Certificate of Program Completion, aging out, left school early (i.e. dropped out).

### Response Rate

Number of leavers in the state during school year 2011 - 2012	7,263
Number of youth for whom data was exchanged	6,200
Response Rate	85.36%*

\*The response rate does not include youth who may be employed outside of the geographic region described above. It also does not include youth who are taking non-credit college courses or auditing college courses.

Maryland used the calculation formula developed by the National Post-School Outcome Center.

Each Respondent has been counted in only one category and only in the highest appropriate category. The chart shows the numerators for the calculation. The baseline data was collected utilizing an Administrative Record Exchange. 4,320 young adults were found to be engaged in postsecondary activities:

1	# of respondent leavers enrolled in higher education	1,678
2	# of respondent leavers in competitive employment	2,443
3	# of respondent leavers enrolled in some other postsecondary education or training	471
4	# of respondent leavers in some other employment	1,608

The individual formulas used to calculate the measurement percentages are as follows:

- A = 1 divided by total Respondents
- B = 1 + 2 divided by total respondents
- C = 1 + 2 + 3 + 4 divided by total respondents

Measurement	Percentage
A. Percent enrolled in higher education [(# of youth who are no longer in secondary school, had IEPs in effect at the time they left school and were enrolled in higher education within one year of leaving high school) divided by the (# of respondent youth who are no longer in secondary school and had IEPs in effect at the time they left school)] times 100.	23.10%
B. Percent enrolled in higher education or competitively employed within one year of leaving high school + [(# of youth who are no longer in secondary school, had IEPs in effect at the time they left school and were enrolled in high education or competitively employed within one year of leaving high school) divided by the (# of respondent youth who are no longer in secondary school and had IEPs in effect at the time they left school)] times 100.	56.73%
C. Percent enrolled in higher education, or in some other postsecondary education or training program; or competitively employed or in some other employment + [(# of youth who are no longer in secondary school, had IEPs in effect at the time they left school and were enrolled in higher education, or in some other postsecondary education or training program; or competitively employed or in some other employment) divided by the (# of respondent youth who were no longer in secondary school and had IEPs at the time they left school)] times 100.	85.36%

#### Statewide Postsecondary Employment Data

By Sex

Male:	1,620
Female:	823
Total:	2,443

By Disability

Disability	Number Youth Employed
Intellectual Disability	154
Hearing Impaired	13
Deaf	3
Speech/Language Impaired	59
Visually Impaired	5
Emotional Disability	262
Orthopedically Impaired	

	0
Other Health Impairment	530
Specific Learning Disability	1,306
Multiple Disability	40
Deaf/ Blind	0
Traumatic Brain Injury	5
Autism	67

**Statewide Postsecondary Education Data**

By Sex

Male:	1,069
Female:	609
Total:	1,678

By Disability

Disability	Total Youth in Post Secondary Education Employed
Intellectual Disability	19
Hearing Impaired	15
Deaf	10
Speech/Language Disability	61
Visual Impairment	8
Emotional Disability	171
Orthopedic Impairment	5
Other Health Impairment	367
Specific Learning Disability	875
Multiple Disabilities	28
Deaf-Blindness	0
Traumatic Brain Injury	6
Autism	113

**Other Postsecondary Employment and/or Training**

Apprenticeships:	0
DORS Employment Training:	471

DDA and DORS Supported Employment:	1,608
Total:	2,079

**Not Engaged:**

Maryland is not able to report an exact number of not engaged youth. This is due to the method used to gather the data. Maryland gathered census data. An administrative record exchange was used for data collection. Maryland was not able to gather data on 1,063 youth who exited during the 2011-2012 school year. This is 14.64% of all youth who exited during that school year. These youth may not be engaged in any meaningful activity, or may be living and working in a state outside of the DLLR catchment region, or taking non-credit college courses, or auditing college courses.

\*\* States were not required to report actual target data for this indicator in the FFY 2008 (2008-2009) APR.
