Narrative Description of Indicator

Indicator 8: Parent Involvement

This indicator assesses the percentage of parents with a child receiving special education services who report that schools facilitated parent involvement as a means of improving services and results for children with disabilities.

In FFY 2016, the DEI/SES changed the state methodology for this indicator and reset the baseline and targets. The new analytic methodology uses a "Percent of Maximum" approach, instead of the previous method of Rasch Analysis. For FFY 2019, 81.93% of preschool parents and 72.00% of school-age parents reported that schools facilitated parent involvement as a means of improving services and results for children with disabilities. During the FFY 2019 performance period, the MSDE, DEI/SES did not meet its target for preschool-age but did meet its target for school age children with disabilities.
